5. Match (A) and (B) to complete the sentence.

(A)

(1) School starts

(2) I enjoy skiing and skating

(3) It takes one hour

(B)

from here to my house.

at 9 am.

in winter.

[6~7] Read and choose the best answer.

When birds fly thousands of kilometers, they fly in a "V" shape. Flying is much easier with that shape. In that shape, they use less energy to fly. That is important when they fly a very long way!

How can they find our road in the sky? They have a "compass" in our heads. It uses the sun to find the road. They also use their noses. We smell the right places to fly!

6. Why do birds fly in a "V" shape?

① V shape makes flying beautiful.

② **Birds can save energy to fly with the shape.**

③ Birds can move faster with the shape.

④ Bird can find the way with the shape.

7. What do they use to find their way? Choose two.

- ① **compass in their heads** ② their feeling ③ **their noses** ④ their eyes

[8~10] Read and answer each question.

Hi! My name is Birdy. I am a bird. Every year, I move thousands of kilometers with my family!

We move at two times of year -- in the spring and in the fall. In the fall, we fly thousands of kilometers from north to south. Then we spend the winter in warm places. We have more food there. Also, warm places are better to raise baby birds. So, we go there to get food and have babies. I was also born in a warm place. In the spring, we fly north again. It is warm again in the north. We can get food in the north in summer.

8. What is this story about?

- ① Different kinds of bird
② Raising baby bird
③ **Bird's long trip**
④ Bird's food in each season

9. Why do the birds move a long way? Choose two.

- ① **To find more food**
② To live in cold places
③ **To raise their baby birds**
④ To save energy in winter

10. When do birds move from south to north?

- ① **in the spring** ② in the summer ③ in the fall ④ in the winter
