

# ELF Book 10 Unit Test (Unit 1)

Date:

Class:

Student Name:

1. Choose the correct word for the blank.

The man is sitting in the \_\_\_\_\_.

- ① bench                      ② boat                      ③ **shade**

2. Choose the word with the same meaning as the underlined part.

The water goes from the roots to the trunk.

- ① cactus                      ② flower                      ③ leave                      ④ **stem**

3. Choose the correct answer.

Plant grows in this. What is this?

- ① bowl                      ② **soil**                      ③ hole                      ④ stone

4. Circle the one that is NOT correct.

I can speak both English or French.

- ①      ②      ③      ④

5. Choose the correct one.

- ① **Both leaves are yellow.**  
② Both Tom and Jane is excellent in class.  
③ Both student likes cheese.  
④ Both child are smart.

[6~7] Read and choose the best answer.

Hi, Andy! I'm your plant. I'm not growing well. Do you know why? You don't give me enough water and sun. You gave me soil to grow in. Only soil is not enough. I also need both water and sun! Sun and water give energy to my roots and leaves. Give me both water and sun, and I will be a healthy plant!

6. What do plants need to grow? Choose the **WRONG** one.

- ① water                      ② sun                      ③ **rice**                      ④ soil

7. Why is Andy's plant NOT growing well?

- ① There is too much water.
- ② The sun is too strong.
- ③ The soil is not good enough.
- ④ **Water and sun are not enough.**

[8~10] Read and answer each question.

How do plants grow with water and sun? Plants have three parts in their body -- leaves, trunks, and roots. The leaves make food. The roots take in water from the soil. Then the water goes from the roots to the trunk. The trunk sends the water out to the leaves. The roots and trunk also hold up the plants. So, the plants don't fall down!

A cactus needs just a little water. Too much water is bad for a cactus. And a moss lives in the shade. It doesn't need lots of sun. Remember, all plants need three things -- water, sun, and soil. But every plant needs a different amount.

8. Read the sentence, and check T(true) or F(false).

- (1) Both cactus and moss need lots of sun.
- (2) Plants need different amount of water.

T <input type="checkbox"/>	F <input type="checkbox"/>
T <input type="checkbox"/>	F <input type="checkbox"/>

9. What do the roots do? Choose TWO.

- ① Make food
- ② **Take in water from the soil**
- ③ Send water to the leaves
- ④ **Hold up the plants**

10. Tom has a moss. Choose the best advice for Tom.

- ① Put it in a sunny place.
- ② It needs lots of water.
- ③ **Shade is the best place for it.**
- ④ Do not give it lots of water.
