Every boxes has a different color.

➔ box

[14~15] Circle the right words.

14. Each (**player** / players) has talent.

15. The wind blows from the (west / **western**).

[Reading]

[16~20] Read and answer the questions.

Our need for energy grows every day. More and more people live on the Earth. And we build more buildings. We make more cars. Here is our problem. We might not have enough energy for the future. Fossil fuels will not last forever. They will run out someday. So we get some of our energy from nuclear power instead. But here is another problem. Waste from nuclear power pollutes soil. And it does harm to living things on the Earth!

16. Why do we get some of our energy from nuclear power?

- ① Because fossil fuels pollute soil.
- ② **Because we need to save fossil fuels.**
- ③ Because nuclear power is better.
- ④ Because we want different energy.

Soccer was played long ago. It was played in different forms. The Chinese played soccer 3,000 years ago. They kicked a leather ball filled with feathers. In Central America, people also played soccer. The sport was a mix of soccer and basketball. Also, ancient Rome had soccer. They kicked a ball into the opponent's goal area. So, where was soccer played first? We don't know the answer. But every corner of the world played soccer.

17. What is NOT true?

- ① People played soccer in central America.
- ② **First soccer was played 3,000 years ago.**
- ③ The Romans played soccer.
- ④ People played soccer in different forms.

Many goods traveled along the Silk Road. Pottery and paper from China passed to Europe. And glass and jade went to China. Also, culture and ideas went along the Silk Road! For example, Buddhism traveled from India to China. The Silk Road passed through the desert and mountains. So, a trip on the Silk Road was tough. People stopped in towns near an oasis. They traded things there. So, many cities and markets developed along the Silk Road.

18. Why did markets and cities developed along the Silk Road?

- ① Because people liked the Silk Road.
- ② Because it was a trade route between China and Europe.
- ③ Because the Silk Road was the only place to live.
- ④ **Because the Silk Road was long and tough, so people stopped near an oasis and trade there.**

Volcanoes erupt with different things. They erupt with gas. They also erupt with hot liquid, magma. Then the magma runs down the volcano. We call it @_____. Also, volcanoes erupt with ash and small rocks. Ash is gray powder. These things from volcanoes affect the Earth. Lava and small rocks change the Earth's surface. They make hills

or mountains. Ash stays in the air for a long time.
It blocks sunlight. It changes the weather!

19. Write the best word for the blank㉠.

➔ lava

20. How does ash affect the Earth?

① It makes the temperature fall down.

② It changes the Earth's surface.

③ It explores a volcano.

④ It makes people not be able to breathe.
